#### 2. FURTHER ACTION

If a demand for international preliminary examination is made, this opinion will usually be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA"). However, this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of three months from the date of mailing of Form PCT:ISA:220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT:ISA:220.

2. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
  - a. type of material:
    - ☐ a sequence listing
    - ☐ table(s) related to the sequence listing
  - b. format of material:
    - ☐ in written format
    - ☐ in computer readable form
  - c. time of filing/furnishing:
    - ☐ contained in the international application as filed.

2. Citations and explanations

**see separate sheet**

Re Item V

**Reasoned statement with regard to novelty, inventive step or industrial applicability;  
citations and explanations supporting such statement**

**Novelty/Inventive step:** Although a similar method is known from WO-A-98:06255 for inducing spawning of Polychaete worms of the families Nereidae and Eunicidae, WO-A-98:06255 does not disclose a exposure time of 14 to 24 days, nor is the known method described as to be applicable to marine worms of the family Arenicolidae.

The prior published documents, cited in the description or in the international search report, either taken individually or in combination do not disclose, suggest or reasonably lead the person skilled in the art to consider the methods for inducing sexual maturation as presently claimed. The person skilled in the art would not be able to combine all the features of claims 1, 3 and 6 and as such arrive at the claimed methods without an inventive activity.

Claims 2 and 8 to 10 are dependent on claim 1, claims 4 and 5 are dependent on claim 3 and claim 7 is dependent on claim 6. As such they also meet the requirements of the PCT with respect to novelty and inventive step.
